

Midam Lab Asia

PREMIUM AESTHETIC SOLUTION

D.D. CUT

Dew Diamond Face Booster Ampoule Solution

THE NEXT EVOLUTION IN SCIENTIFIC CONTOURING

Midam Lab Asia

THE CURATOR OF BIO-TECH

Bridging advanced Korean dermatological science with safe clinical operations.

Scientific Foundation: Focusing on precise protein blending ratios to maximize clinical efficacy without irritation.

Regulatory Excellence: Ensuring 100% legal integrity for global professionals through strictly topical formulas.

B2B Empowerment: Designed exclusively to increase clinic profitability and patient retention.

Manufacturing Partner

Janytree Inc.

Manufactured by South Korea's premier Dermo-Cell cosmetics facility, utilizing pharmaceutical-grade GMP (ISO 22716) quality control standards for professional aesthetic solutions.

PRODUCT OVERVIEW

Sculpted Contour & Seamless Calm

D.D. CUT is a professional-grade contouring solution that refines facial silhouettes while providing intensive barrier recovery.

CLINICAL ACTION

Natural lytic enzymes target localized puffiness and sagging, while high-concentration Centella stabilizes the skin canvas for immediate aesthetic refinement and zero downtime.

CORE TECHNOLOGY

Proprietary Protein Blending Ratio

The secret to our zero-downtime efficacy lies not just in the ingredients, but in the exact scientific proportions.

1. The Lytic Agent **Bromelain 0.5%**

2. The Transporter **Lecithin 1.0%**

3. The Stabilizer **Centella Asiatica 3.346%**

ACTIVE 01: BROMELAIN

The Lytic Powerhouse (0.5%)

A powerful natural protease enzyme extracted from the stems of pineapples, designed to target and melt unnecessary protein structures.

- 💧 **Protein Lysis:** Breaks down complex peptide bonds to smooth skin texture.
- ⚡ **Edema Reduction:** Rapidly relieves localized swelling and puffiness for a sharper V-line.
- 🛡️ **Anti-Inflammatory:** Inhibits pro-inflammatory cytokines to prevent post-treatment stress.

ACTIVE 02: LECITHIN

The Transporter (1.0%)

A premium amphiphilic surfactant that attracts both water and fatty substances, ensuring maximum delivery of active ingredients.

-  **Emulsification:** Facilitates the movement and breakdown of triglycerides and waste.
-  **Cellular Detergent:** Acts on the fat cell walls to safely dismantle unnecessary accumulation.
-  **Absorption Booster:** Drastically enhances the deep dermal penetration of the ampoule.

ACTIVE 03: CENTELLA ASIATICA

Intensive Calm (3.346%)

D.D. CUT is uniquely formulated with a massive dosage of high-purity Centella Asiatica Extract to ensure the skin remains perfectly calm during the contouring process.

- 🌿 **Immediate Soothing:** Neutralizes irritation instantly, ensuring zero downtime.
- 🏗️ **Barrier Repair:** Rebuilds the foundational skin structure and improves elasticity.
- ⌚ **Collagen Synthesis:** Supports the underlying dermal matrix for a taut, youthful complexion.

SYNERGY COMPLEX

Multi-Peptide Matrix

Cellular signals designed to trigger profound dermal tissue regeneration and tightening.

- ✓ **sh-Polypeptide-11 & 3:** Induces cellular growth and core elasticity.
- ✓ **sh-Oligopeptide-1:** Key factor in damaged skin repair.
- ✓ **Acetyl Hexapeptide-8:** Smooths fine lines and relaxes surface tension.

Botanical Calming Blend

A trio of premium herbal extracts supporting the Centella base for absolute skin comfort.

- ✦ **Scutellaria Baicalensis:** Potent antioxidant protection.
- ✦ **Salvia Miltiorrhiza:** Promotes micro-circulation.
- ✦ **Chamomilla Recutita:** Deep soothing for sensitive skin.

TRIPLE ACTION MECHANISM

01

LYSIS

Bromelain

Targets and melts unnecessary proteins while rapidly reducing localized swelling and puffiness.

02

TRANSPORT

Lecithin

Acts as a powerful emulsifier, breaking down waste structures and enhancing deep dermal delivery.

03

STABILIZATION

Centella & Peptides

Immediately rebuilds the barrier, ensuring zero irritation and leaving a serene, taut finish.

PRECISION MANUFACTURING

Produced under strict ISO 22716 (Cosmetic GMP) standards by Janytree Inc.

GLOBAL REGULATORY SAFETY

100%

LEGAL COMPLIANCE

Zero Compliance Risk for Clinics

For External Professional Use

D.D. CUT is meticulously formulated and legally classified as a topical cosmetic. Clinics can offer profound contouring results using device-based delivery without assuming unauthorized injection liabilities.

KFDA / MFDS (Korea): Official Registration & CFS

TFDA (Thailand): Registered (10-2-6900003393)

GS1 Global: Authorized GTIN tracking

PROFESSIONAL CLINIC PROTOCOL

- 1 Preparation** Cleanse the face thoroughly. Distribute the D.D. CUT ampoule evenly onto the target areas (jawline, cheeks, submental region).
- 2 Device Integration (Synergy)** Combine with **LDM (Ultrasound)** or **Electroporation (EP)** devices. The micro-massage enhances lymphatic drainage while maximizing deep dermal absorption of proteins.
- 3 Seal & Finish** Complete the treatment with a cooling modeling mask or RED LED therapy to lock in the active ingredients and accelerate the Centella calming effect.

EXPECTED CLINICAL OUTCOMES

Cutting
Effect

**With Zero Downtime,
Immediate Return to Daily Life**

D.D. CUT

The Next Evolution

Upgrade your clinic's contouring portfolio with the most scientifically advanced, legally safe, and highly profitable face booster solution on the market.
